

IMPALA DANGEROUS GAME CARTRIDGES

Japie Nel, Professional Hunter in South Africa and Zimbabwe for 25 years:

“Even as an experienced hunting guide you can still learn. The Impala Light Solids combine enormous penetration with excellent killing power on game. Recoil is much less and it is easier to hit accurately with your mighty DG rifle. For my clients I absolutely recommend this ammunition for all kinds of game.

As a stopper for buffalo and elephant I rely on the RN load in my .458 Lott. Impala Cartridges offer best performance and highest energy at a price that is still affordable for an African PH”.
